Sequence 30507, Application US/09270767
Patent No. 6703491
GENERAL INFORMATION:
APPLICANT: Homburger et al.
TITLE OF INVENTION: Morieic acids and proteins of Drosophila melanogaster
FILE REFRENCE: File Reference: 7326-094
CURRENT APPLICATION NUMBER: US/09/270,767
CURRENT APPLICATION NUMBER: US/09/270,767
SOFTWARE: PatentIN Ver. 2.0
SOFTWARE: PatentIN Ver. 2.0
LENGTH: 722

Sequence 4752, Application US/10956157
Publication No. US20050118625A1
GENERAL INPORATION:
APPLICANT: Wyeth
APPLICANT: WornTron: NUCLEIC ACID ARRAYS FOR DETECTING GENE EXPRESSION ASSOCIATED WITH-
TITLE OF INVENTION: HUMAN OSTEOARTHRITIS AND HUMAN PROTEASES
FILE REFERENCE: 031896-043000 (AM 101081)
CURRENT APPLICATION NUMBER: US/10/956,157
CURRENT FILING DATE: 2004-10-04
NUMBER OF SEQ ID NOS: 319805
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            1320

```

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

CR617950 1555 bp mRNA linear HTC 21-JUL-2004 N full-length cDNA clone CS0DJ008YF12 of T cells (Jurkat cell line) N CR617950 CR617950.1 GI:50498757 HTC; CNSLT_cDNA. Home sapiens (human)		Genoscope. Jenoscope. Direct Submission Submitted (20-JUL-2004) Genoscope - Centre National de Sequenc Submitted (20-JUL-2004) Genoscope - Centre National de Sequenc BP 191 91006 EVRY cedex - FRANCE (E-mail : seqref@genoscope.cn - Web : www.genoscope.cns.fr) Ist strand cDNA was primed with a NotI-oligo(dT) primer. Five end enriched, double-strand cDNA was digested with Not I and c into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Lib	was normalized. Library was constructed by Life Technologies, a division of Invitrogen. List strand CDNA was primed with a Not! Olight prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and Ecox V sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen. This sequence belongs to sequence cluster Por more information about this cluster, see

1st strand cDNA was primed with a Not1-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMYSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen. This sequence belongs to sequence cluster
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               120

Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR vietes of the pCMVSPORT 6 vector. Library was normalized.

Ist strand cDNA was primed with a NotI-oligo(dT) primer. Five prime
end enriched, double-strand cDNA was digested with Not I and cloned
into the Not I and EcoRV sites of the pCNVSPORT 6 vector. Library
was not normalized. Library was constructed by Life Technologies, a
division of Invitrogen.
This sequence belongs to sequence cluster 9980.f
